Front End Web Developer with a passion to work on new things to make life easier and have impact in the world. With experience in JavaScript and React and a background in web design, and experience in working with a team following Agile project management methodologies.

TECHNICAL PROJECTS

Doctor Booking (Team project) - [Github](#) | [Demo](#)

A website to book doctor appointments to save the patient time and effort and helps the doctors to better manage their appointments.

- Used React.js as the main framework to build the entire website.
- For the database and the authentication used firebase.
- Used Bootstrap for styling and SCSS to add custom styles.
- Used MapBox to locate doctors clinics on the map.
- Added internationalization to the website using i18next.
- Used Jest for Testing.

Favourite Songs (Team project)

A platform for bootcamp fellows to share their favourite songs on personal profiles to get discovered by others.

- Used React.js to build the website.
- Used Firebase for the database and the authentication.
- Used MDB (Bootstrap components with material design flavour) for styling alongside side with css to add custom styles.

TECHNICAL SKILLS

HTML, CSS, Javascript, React, Node.js, Express.js, Bootstrap, Firebase, Tailwind, Git & Github
